ABOUT ME

Hi, I am a React frontend developer, I use the most popular technologies like HTML5, CSS, JavaScript, TypeScript, ReactJs, Redux to create amazing Apps and I complement every application with backend technologies like nodeJs, express, MongoDB, PostgreSQL, MySQL. Positive actitude, responsable, hard worker and work ethic. I enjoy solving problems to help, also I like teach others what I know.

ABILITIES

Front-end: HTML, CSS, SASS, Boostrap, Tailwind, JavaScript, TypeScript, React, Redux.
Backend: Node.Js, Express, MySQL, PostgreSQL, MongoDB, Firebase.
Others: Linux, Git, GitHub, Figma, Photoshop, Adobe Illustrator, Excel, Visual Basic

EXPERIENCE | +1 year doing projects by my own

- **Coffee shop Rest server**: an API to consult and save data - MongoDB | Express | NodeJs

- **Calendar App**: create events, manage the days and share them with people, the data is consumend by an API - MongoDB | Express | Reactjs | NodeJs

- **Delivery food restaurant App**: where people can order and the restaurant can upload new products for clients - React | Redux | Tailwind

- **Blog App**: just an App to share knowledge, tips or tricks with people, every post is saved on a data base and can be consulted by an API - PostgreSQL | Express | Reactjs | NodeJs | SASS
